BEHAVIOR:
Good medication compliance is noted. Her self care skills are impaired and she needs assistance or cues. She needs assistance with domestic tasks. She is socializing less with family and friends. Her work performance is marginal. There are signs of substance abuse problems. Her functioning in school is impaired. There have been more outbursts or expressions of anger. Impulsive behaviors are still occurring. Eva has normal food and fluid intake. Eva has not been confused.

Eva presents as flat, inattentive, minimally communicative, disheveled, over weight, and slow to respond. She exhibits speech that is normal in rate, volume, and articulation and is coherent and spontaneous. Language skills are intact. Mood presents as normal with no signs of either depression or mood elevation. There are no apparent signs of hallucinations, delusions, bizarre behaviors, or other indicators of psychotic process. Associations are intact, thinking is logical, and thought content appears appropriate. No suicidal ideas or intentions are present today.

Plan: Continue to accommodate client to the best of shelter abilities and continue to prompt client to continue participating in programming plans now being implemented by shelter staff.
